Subj: Interim Measures Work Plans for Solid Waste Management Unit 14/46 and Solid Waste Management Unit 39, Naval Support Activity Mid-South, Millington, Tennessee

Dear Mr. Head:

The Environmental Protection Agency has completed review of the subject documents dated October 12, 2004. The interim measures work plans delineate the approach to be used for remediation of solid waste management units 14/46 and 39 through enhanced bioremediation. The work plans describe the system design in detail and state that recommendations for modification will be included in post-injection progress reports. We have no comments regarding these work plans, however, we understand that you intend to submit work plans for the monitored natural attenuation part of the remedy at a later date.

If you have any questions regarding our review, please contact Joel Huey at 404-562-9104 until January 21, 2005, or call me at 404-562-8791.

Sincerely,

A handwritten signature in black ink that reads "Harold Taylor".
