Subject: CTO-094; NSA Memphis RCRA Facility Investigation,
Millington, Tennessee
Document Transmittal — *Assembly C CSI Report (Revision 1) -
SWMUs 26, 27, and 62, May 24, 1996*

Reference: Contract N62467-89-D-0318 (CLEAN II)

Dear Sir:

Please find enclosed a copy of the distribution list for the NSA Memphis *Assembly C CSI Report (Revision 1) — SWMUs 26, 27, and 62*. Your copy of the report was submitted on May 24, 1996. As requested at the NSA Memphis BRAC Cleanup Team (BCT) meeting this week, copies are now being distributed to the BCT and others as shown on the attached NSA Memphis RFI Distribution List.

Analytical data from surface soil samples collected after submittal of Revision 0 have been incorporated into the report along with preliminary risk evaluations (PREs) prepared using the new data. These actions were recommended in Revision 0. Reports for SWMUs 15 and 21 have not been included in this revision. Separate RFI reports incorporating data from recently installed monitoring wells will be prepared for these SWMUs.

U.S. Environmental Protection Agency (USEPA) and Tennessee Department of Environment and Conservation comments on the Revision 0 reports for SWMUs 26, 27, and 62 have been addressed. Specifically, subsurface soil data is now being compared to USEPA soil screening levels for protection of groundwater, rather than USEPA risk-based concentrations for residential and industrial soil. Surface soil data is compared to both. Also, the comment suggesting rewording the No Further Action (NFA) statements for these SWMUs is no longer relevant because the exception to NFA that was cited (i.e., collecting surface soil data and preparing PREs) has been completed.

Commanding Officer
