Subject: **BRAC Environmental Site Screening Report**  
Study Area 39  
NTC, Orlando  
Contract: N62467-89-D-0317

*original  
Signed Copy*

Dear Wayne:

Enclosed is the Final BRAC Environmental Site Screening Report for Study Area 39. We have updated the Draft Final report issued in September 1997 to reflect:

- Additional soil sampling to vertically delineate PAHs and arsenic in surface soil
- Destruction of 7 monitoring wells during construction along the utility corridor north of Lake Gear, and
- The recent change in reuse for this parcel from mixed office and residential to nonresidential

We have also sent copies of the report to other members of the BRAC Cleanup Team for their review. If you have any questions or need additional information, please call me at (904) 772-7688.

Very Truly Yours,

**Harding Lawson Associates**
