Mr. Michael Planert
U.S. Department of the Interior
Geological Survey
Water Resources Division
227 N. Bronough Street, Suite 3015
Tallahassee, FL 32301

Dear Mr. Planert:

On behalf of the Coastal Systems Station (CSS), Panama City, and Southern Division Naval Facilities Engineering Command (SOUTHNAVFACENGCOM), enclosed is the revised Final Phase 2 RCRA Facility Investigation Workplan, Coastal Systems Station, Panama City, Florida dated March 1994. The revisions to this document are in responses to comments to the Draft Workplan, submitted in June, 1993 and the Draft Workplan Addendum submitted in December, 1993.

The original intent of this document was to revise Section 7 of the RFI Phase 1 report and submit it as part of the RFI Phase 1 report. However, per Wayne Hansel's (SOUTHNAVFACENGCOM) and Peter Dow's (Region IV USEPA) request, the RFI Phase 1 report will not be submitted as a final report. The information obtained from the Phase 1 investigation will be combined with the information from the Phase 2 investigation and one Final RFI report will be submitted. Therefore, this document is no longer submitted as Section 7 of the Final Phase 1 RFI report. However, because this report has previously been reviewed by FDEP and EPA, no formatting changes were made.

Please contact Mr. Wayne Hansel at (803) 743-0615 or Mr. Arturo McDonald at (904) 234-4743 with questions.

Commanding Officer
Wayne Hansel/Code 1856
SOUTHNAVFACENGCOM
