RE: Response to Comment Letter dated January 18, 2007 from Tetra Tech for Final Resource Conservation and Recovery Act Facility Investigation Addendum Report for Solid Waste Management Unit 2, Naval Support Activity Panama City, Panama City Florida

Dear Mr. Gates:

The Department has completed the technical review of the above referenced letter (which is attached) and the Final SWMU 2 Resource Conservation and Recovery Act Facility Investigation Addendum Report dated January 18 (received January 22, 2007). Both documents are adequate for their intent and approved. Please note the following comments for the record:

1. The Department concurs with the recommendation to prepare a confirmation sampling plan to determine if the remedial actions stated in this report achieved the designated objective. The Department concurs with the response listed in the "Response to Comments" attached to the letter dated January 18, 2007 and approves the text which states, "A remedial action work plan should be prepared..."
2. The Department concurs with requiring a Land Use Control (LUC) that limits certain future uses of the site and prohibits performance of intrusive work at the site and removal of material from the site without permission from the Department of Environmental Protection.

If I can be of any further assistance with this matter, please contact me at (850) 245-8998.

Sincerely,

Tracie L. Bolanos
Remedial Project Manager
