**TELEPHONE MEMORANDUM**

**PROJECT NO.:**0759301

**DATE:** 08/26/93

**CLIENT:** SOUTHDIVNAVFACECOM

**PROJECT DESCRIPTION:** Panama City

**BETWEEN:** Rhonda Hunt

**AND:** David Clowes, FDEP

**SUBJECT:** Site 455 Issues

David and I called each other and left messages several times today and finally spoke with each other at 4:30 pm. David said that he had spoken with Ed O'Connell and that he'd written up a summary of his dept's feelings on the additional sites at CSS Panama City. He will pass the summary through his people and fax a copy to me when it's final. David told me that they do not approve of construction at Building 455 and Site 363 prior to remediation, but because the Navy says that they will assure that the construction won't interfere with the investigations and all structures can be removed at necessary the state won't block the proposals. He also said that the state would like to assure that Building 455 will be addressed and he feels that addressing it under our program would be fine. The state is using the "Part 264 closure" as a hammer over the facility to assure that they handle the remediation.

David asked me if I had received the comments on the Work Plan and CAMP and I told him that Wayne faxed them to me yesterday. I told him that I'd discuss with Wayne how we wanted to handle responding to the comments and David suggested that we have a meeting at the site with Peter Dao, the facility people, and him.
