Dear Captain Gilbert:

On May 30, 1979, I visited the Pensacola Naval Air Station at your request to review the area for possible endangered or threatened species Critical Habitat. Mr. Bruce Tanner conducted Don Wood, Florida Game and Fresh Water Fish Commission, and myself on a tour of the station.

Mr. Wood sent you a letter on June 11, 1979 containing biological information on species which might be found on the station. This letter contained a complete list of federally endangered or threatened species in the area and I have none to add to this. I also feel that no potential Critical Habitat for currently listed endangered or threatened species occurs on the station.

I appreciated the opportunity to visit the station and if I can be of further assistance please contact me.

Sincerely,

James L. Baker
