Subj: Hazardous Waste Surface Impoundment Ground Water Assessment Plan, Navy
Public Works Center, Pensacola, Florida

Dear Mr. Kellenberger:

Per 40 CFR 265.93(d)(2), the referenced draft assessment plan has been prepared and a copy was delivered to you on 3 April 1984 during our meeting.

Because of the stringent time requirements imposed by the cited regulations, this plan was not adequately reviewed nor was it correlated with other ground water monitoring work currently in progress. It is anticipated that some changes will be made to the plan and, at a minimum, time schedules will be modified.

Upon your review of this-draft plan, request we meet again, at a mutually agreeable time and location, to incorporate amendments into the final plan.

Sincerely,

EDWARD A. PIKE
Environmental Engineer
By direction of the
Commanding Officer
