Dear Doctor Coling:

The Superfund Amendment and Reauthorization Act (SARA) of 1986 requires all Department of Defense activities with Installation Restoration Programs to implement a Technical Review Committee (TRC). This committee will actively participate in the development of the scope of work for the Remedial Investigation (RI), provide comments and technical review during the execution of the RI, and assist in the selection of remedial technologies based on data gathered by the Navy. Along these lines, a TRC is being established for Naval Air Station, Pensacola, Florida.

I would like to extend an invitation for you, or a designee assigned by you, to serve as a committee member. Other members will include representatives from other environmental agencies, the Navy, local authorities, and public representatives. The first meeting of the TRC has been set for January 12, 1989 at 2:30 p.m. in Building 624.

Please advise Mr. Downys Ray at 904-452-4515 of your decision. The enclosed gate pass will facilitate your entry to the naval air station.

Sincerely,

HARRY A. JUPIN
Captain, U.S. Navy
Commanding Officer
