Re: Draft Final Sampling and Analysis Plans
Sites 3, 9, 10, 14, 29 and 34
NAS Pensacola
Contract # N62467-89-D-0318/CTO-070

Dear Mr. Nuzie:

On behalf of the Navy, EnSafe/Allen & Hoshall is pleased to submit two copies each of the Draft Final Sampling and Analysis Plans for Sites 3, 9, 10, 14, 29 and 34 at the Naval Air Station Pensacola in Pensacola, Florida.

Please let us know if you have any questions or comments regarding the plans.

Sincerely,

EnSafe/Allen & Hoshall

Henry H. Beiro
Task Order Manager

**FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION
RESPONSE TO COMMENTS
DRAFT SAMPLING AND ANALYSIS PLANS (SAPs)
FOR SITES 3, 9, 10, 14, 29, AND 34
NAVAL AIR STATION (NAS) PENSACOLA
PENSACOLA, FLORIDA**

I have reviewed the above referenced documents (received October 4, 1993) submitted for this site. Overall, the documents appear to be acceptable in describing the **specific** sampling techniques necessary for the assessments.

However, it is recommended that due to conflicting groundwater sampling results from monitoring wells installed in previous studies over the past ten years, appropriate wells should be resampled and water level measurements **collected**. The purpose of the resampling is to construct a reliable database necessary to expedite and increase the efficiency of future assessments and help determine whether **screening** sites should remain at their present **status** or progress to the RI/FS level. Additionally, the **soil** borings results should be considered prior to installing the proposed monitoring well. In summary, with reliable **data** from both the soil borings and presently installed wells, decisions **as** to the need and location for the additionally proposed wells **can** be wisely and prudently determined.

RESPONSE

As agreed in the Partnering meeting on January 21, 1994 the investigation of these sites has **been** revised into a three-phased approach. This approach incorporates many of the elements cited in USEPA General Comment 1, and is fully **described** in the revised SAPs.
