Re: Naval Air Station Pensacola, National Priority List Site,

1. Draft *Sampling and Analysis Plan, Site 12, Scrap Bins*, May, 1994
2. Draft *Sampling and Analysis Plan, Site 26, Supply Department Outside Storage*, May, 1994
3. Draft *Sampling and Analysis Plan, Site 36, Industrial Wastewater Treatment Plant Sewer Line*, May, 1994

Dear Mr. Hill:

We have reviewed the above referenced documents and provide the following comments.

Sampling and Analysis Plan, Site 12

Section 4.3 (Sample Locations and Rationale) - p. 9

1. The subsection, Surface Water Samples, indicates one surface water sample will be taken, but the location of that sample is not denoted in Figure 4-1.
2. The subsection, Sediment Samples, indicates six sediment samples will be taken; two of which are not shown on Figure 4-1. The sentence indicates an upstream sample, a downstream sample, and a sample at the drainage system outfall which appears to be three samples rather than two. If the sentence is meant to indicate that the drainage outfall is the location of the downstream sample, then the sentence should be rephrased. However, we believe a sample downstream of the site, yet upstream from the outfall, should be included if the drainage outfall is more than 500 feet from the site. The location of all the sediment samples should be indicated on the map, or in a map inset. The four onsite samples are adequate.
