Re: Draft Final RI/FS Work Plans for OUs 15-17;  
NAS Pensacola, Florida  
EPA Site ID No.: FL 9270024567

Gentlemen:

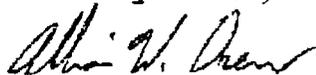

The Environmental Protection Agency (EPA) is in the process of reviewing the Draft Final Work Plans for Operable Units (OUs) 15-17 (Bayou Grande, NASP Wetlands and Pensacola Bay, respectively), which were received in this office on November 29, 1993. Per the approved FY 94 Site Management Plan (SMP), these work plans will go final on December 28, 1993 unless correspondence is received from any Party requesting additional modification.

EPA requests that *the* deadline for finalization of these work plans be extended by an additional 21 days, or until January 18, 1993. The additional time is needed due to the large number of modifications which were incorporated between the draft and draft final stages of document revision, and the coincidence of holidays and RPM meetings with EPA's review time. The additional time will allow EPA to provide the Navy with full assurance that the documents meet Agency requirements. This should assist the Navy in achieving its goal of implementing an adequate investigation and preparing an acceptable Remedial Investigation Report for these OUs.
