RE: Draft Final Sampling and Analysis Plans (SAPs) for
Sites 12 (Scrap Bins) and 26 (Supply Department Outside
Storage), Naval Air Station Pensacola.

Dear Mr. Hill:

I have completed the technical review of the subject documents, dated January 1994 (received January 12, 1994). The documents can be considered final if the following comments are incorporated:

1. The results from Ensafe's Phase I investigation should include detailed comparisons with previous investigations, such as E & E's 1991 Phase I assessment. Comparison should include differences/similarities of sampling locations, sampling techniques as well as results. Note, the specific sampling locations and results from all assessment rounds should be plotted for each media on the same figures, if possible. Comparison between assessments is necessary in order to utilize all available data, facilitate document review, and to determine if a repeat of the Phase I assessment was necessary and cost effective. In general, with the present emphasis on remediation versus assessment, assessment repetition should be avoided if possible.
2. All final technical documents should be signed and sealed by a State of Florida certified professional.

Mr. Bill Hill
