RE: Draft Proposed Plan for Operable Unit 10, NAS Pensacola

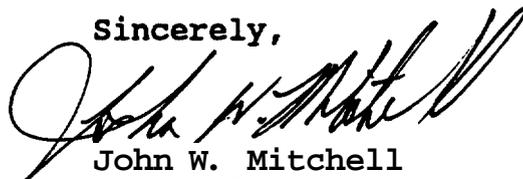

Dear Mr. Hill:

I have completed the technical review of the above referenced document dated November 10, 1995 (received November 13, 1995). As discussed at our partnering meeting on December 13, the document addresses most of the needed requirements, but it needs to be written in a less technical manner for public consumption. Specific comments as discussed in our last meeting are:

1. More information on the risks from groundwater should be included and that the remediation of the groundwater will be handled under the existing RCRA permitted recovery system.
2. There should be only one point of contact for the public to submit comments or request information. The contact person should be a representative of NAS Pensacola. We recommend one of the following: Ron Joyner, Michelle Harrison, or the base commander.

If I can be of any further assistance with this matter, please contact me at (904) 921-9989.

Sincerely,

John W. Mitchell
Remedial Project Manager
