RE: Draft Proposed Plan Fact Sheet for Operable Unit 10, NAS
Pensacola

Dear Mr. Hill:

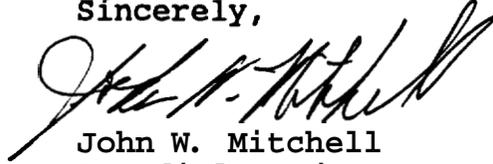

I have completed the technical review of the above referenced fact sheet received December 21, 1995 by facsimile machine. The Proposed Plan Fact Sheet has been simplified, but I suggest the following deletions and changes.

1. Under the Ecological Risk Section, I suggest simplifying it further by deleting the third, fifth, and last three paragraphs. As there were no ecological risks determined from the site, these paragraphs may only confuse the intended reader. As is stated previously in the fact sheet, anyone needing more detailed information can find the documents at three public libraries.
2. On Page 6, Alternative 2 should mention the contingency alternative to be used if the soil fails the leachability test.
3. On Page 8, under the section Treatment to Reduce Toxicity, Mobility, or Volume, I suggest rewording the last portion as follows: "Alternative 2 will verify whether soil is impacting groundwater. If groundwater will not be affected by the soil, natural processes should reduce existing contamination."

Mr. Bill Hill
