RE: Final Preliminary Site Characterization Report Site 14, NAS  
Pensacola

Dear Mr. Hill:

I have completed the technical review of the errata pages (received February 19, 1996) for the above referenced document dated November 17, 1995 (received November 20, 1995). As my comments have been incorporated, the document is approved as final. As per discussion at our last partnering team meeting, to assure that the recommendation in the document for the partnering team to review and approve plans for use of the sediment and berm material as fill, the Navy will need to sign a consent agreement with the department which will assure that this institutional type control is met.

If I can be of any further assistance with this matter, please contact me at (904) 921-9989.

Sincerely,

John W. Mitchell  
Remedial Project Manager
