Commanding Officer,  
Southern Division, NAVFACENGCOM  
Attn: Mr. Bill Hill (code **1851**)  
P.O. Box 190010  
North Charleston, South Carolina 29419-9010

SUBJ: Concurrence with Nov 1995 Final Preliminary Site Characterization (PSC)  
Report for Site 14 (Dredge Disposal Area), Naval Air Station (NAS)  
Pensacola, Florida  
EPA Site ID No.: FL9170024567.

Dear Mr. Hill:

The U.S. Environmental Protection Agency (EPA), has reviewed the Site **14** (Dredge Disposal Area) PSC report, concurs with the Navy's recommendation for no further investigation, as dredge sediments do not pose an unacceptable risk, and accepts this report as final. Noted is that any potential ecological concerns in relation to a possible discharge to the bay would be addressed in the Site 40 & **42** Investigation, therefore, EPA expects that the Sites 40 & **42** RI report will evaluate this risk and the potential for a release in light of erosion of the dredge spoil containment structure.

If you have any questions please contact me (404) 347-3555, extension 6462.

Sincerely,

Jay V. Bassett,  
Remedial Project Manager  
Federal Facilities Branch
