CERTIFIED MAIL - RETURN RECEIPT REQUESTED

Mr. John Mitchell
Florida Department of Environmental Protection
Twin Towers Building
2600 Blair Stone Road
Tallahassee, FL 37399-2400

Subj: NAS PENSACOLA INSTALLATION RESTORATION PROGRAM SITE 22,
REFUELER REPAIR SHOP

Dear Mr. Mitchell:

This letter provides official notification that Site 22 has been transferred to the Petroleum Program. Fieldwork completed to date at the subject site has resulted in only petroleum related contaminants as indicated in the enclosed analytical results. This was addressed at the NAS Pensacola Tier I Partnering meeting held in Charleston on 20 - 22 August 1996 and a decision was made to continue the investigation under the Petroleum Program. The site investigation will be completed under F.A.C. 62-770 and therefore will not be tracked in future Installation Restoration Site Management Plans. The site name has been changed to UST 26.

The following protocols were established during the October 22-23, 1996 Partnering Meeting:

a. Preparation of a separate Contamination Assessment Plan is not required since an existing Sampling and Analysis Plan under the CERCLA program has been approved and subsequent agreements concerning additional sampling have been agreed to by the NAS Pensacola Tier 1 team.

b. Investigation protocol should use Soil Cleanup Goals for Florida as the benchmark values for soil evaluation and remediation (as opposed to OVA soil headspace).

Subj: NAS PENSACOLA INSTALLATION RESTORATION PROGRAM SITE 22,
REFUELER REPAIR SHOP

c. Analytical protocol for groundwater should comply with the requirements set forth in F.A.C. 62-770.

If you have any questions, please call me or Bill Gates at (803) 820-7324 or (803) 820-7360, respectively:

Sincerely, --

WILLIAM J. HILL
Environmental Engineer
