CERTIFICATION OF APPROVAL

RE: Remedial Design at Site 2; NAS Pensacola, Florida.

Naval Air Station Pensacola, Florida, is undergoing investigation and remedial actions under the federal Comprehensive Environmental Response, Compensation, and Liability Act, as amended. In my professional judgment, the engineering features described in the engineering document, Focused Feasibility Study, Site 2; NAS Pensacola, Florida, provides reasonable assurance of reducing applicable pollutants below quantities which may be potentially harmful or injurious to human health or welfare and animal or plant life in accordance with state criteria as required by Chapter 376, F.S.

I have not evaluated and do not certify aspects of this plan that are outside the limits of my review responsibilities and outside my area of technical expertise (including but not limited to electrical, mechanical, and structural features). I personally conducted this review.
