RE: Errata Baseline Risk Assessment, Final Remedial  
Investigation Report, Site 38, NAS Pensacola

Dear Mr. Hill:

I have completed the technical review of the above referenced document dated September 30, 1998 (received October 1, 1998) and the response to comments received from the Department and University of Florida reviewers. The document adequately addresses the comments; however, it may not fully reflect the current data available for the site.

The additional groundwater samples collected for lead at the Building 71 area (discussed during the February 23 and 24, 1999 Partnering Meeting) are not included in the data set.

If I can be of any further assistance with this matter, please contact me at (850) 921-9989.

Sincerely,

*Joseph F. Fugitt*

Joseph F. Fugitt, P.G.  
Remedial Project Manager
