RE: Removal of Land Use Restrictions
Screening Sites 7, 10, and 18 - Naval Air Station Pensacola
Contract # N62467-89-D-03 18/0970

Dear Mr. Fugitt:

As presented in the *Final Completion Report for Remedial Work, Various Sites, NAS Pensacola* dated 19 November 1998 by Bechtel, Inc., small volumes of soil with parameters above Florida's residential cleanup goals (CGs) were removed from each of the above-referenced screening sites. Post-removal sampling confirmed remediation of contaminants to below Florida's residential CGs. Therefore, the detected concentrations remaining in soil and groundwater allow for unrestricted use, and the sites no longer require the industrial-only land use controls previously requested by your department. The Navy requests that FDEP provide concurrence and grant these sites No Further Remedial Action status. The USEPA had previously concurred with this status for the subject sites, and did not request land use restrictions.

If you have any comments or questions concerning this request, please contact me at your earliest convenience

Sincerely,

EnSafe Inc
