RE: Draft Remedial Investigation (RI) Report Addendum - Operable Unit (OU)13
Naval Air Station Pensacola, Contract N62467-89-D-0318/071 and 970

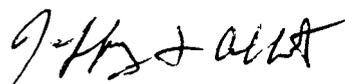

Dear Mr. Rigby:

On behalf of the Navy, EnSafe Inc is pleased to provide notification of the submittal of the draft RI Report Addendum for the above-referenced OU.. The following provides the Executive Summary of this submittal:

A supplemental field investigation has been completed at OU13 (Sites 8 and 24), Naval Air Station Pensacola. This work was required to confirm that contaminants in groundwater were not extending to offsite areas, and to assure that all soil and groundwater contaminants contributing to site risk had been identified. Six soil borings and six monitoring wells were completed and accompanying soil and groundwater samples collected. All field aspects of the additional investigation were executed in accordance with applicable NASP-specific guidance and procedures. Results indicated that contaminants in groundwater are not extending to offsite areas, and all contaminants in soil and groundwater that contribute to site risk have been identified. Since there are no site conditions differing from those evaluated in the Feasibility Study (FS), it is recommended that the alternatives analyses presented in the FS be accepted as appropriate for remedy selection at these sites.

Should you have any questions or comments regarding this submittal, please contact me at your earliest convenience.

Sincerely,
EnSafe Inc
