RE: **Draft Site Assessment Report Addendum for Underground Storage Tank (UST) Site  
18, Naval Air Station Pensacola, Pensacola Florida.**

Dear Mr Hill:

The Department has completed the technical review of the above referenced document dated December 19, 2006 (received December 20, 2006) with the following comments:

1. **Figure 4-9:** After reviewing this figure the Department feels that more assessment needs to be conducted on the west boundary of both the northern and southern plumes at this site.
2. **Page 5-1, 3<sup>rd</sup> bullet:** The Department would like to see a vertical profile of the groundwater plumes at this site. This will help in visually interpreting these results and determine if the site has been vertically delineated.
3. **Page 5-1, 5<sup>th</sup> bullet:** Please compare the iron and manganese exceedences found in these monitoring wells and determine if the concentrations exceed the background data set for the same constituents. The Department will be open to discussing options for this situation after this information has been provided.

If I can be any further assistance with this matter, Please contact me at (850) 245-8998.

Sincerely,

Tracie L. Bolanos  
Remedial Project Manager
