

NAS Pensacola Partnering Team Conference Call Summary

Date: November 14, 2008

Time: 9:03 am - 10:51 am

Meeting ID: 6773

Participants:

Patty Marajh Whittemore (NAVY)

Tracie Bolaños (FDEP)

Yarissa Martínez (TtNUS)

Greg Campbell (NAVY)

Allison Harris (EnSafe)

Gerry Walker (TtNUS)

Ron Kotun (TtNUS)

Greg Fraley (USEPA)

Brian Caldwell (TtNUS)

Purpose: The purpose of the meeting was to discuss with the partnering team the upcoming partnering meeting agenda, RAB agenda and presentations and to get consensus for the sampling rationale and methods to be addressed in the OU11 UFP SAP.

Topics discussed:

- December 2 & 3, 2008 Partnering Meeting Agenda
 - Susan Barnett presentation might need more time
 - Mike Singletary will not be able to attend the partnering meeting
 - OU 10 field visit will be changed to LUC Annual Inspection.
 - RAB necessity and possible dissolution will be discussed following the RAB meeting.
 - Schedule future meetings
 - On Board Review documents
 - Response to Comments for Site 45 RI
- RAB – December 2, 2008
 - Patti Whittemore will give an introduction
 - Gerry Walker and TtNUS technical support personnel will present information on OU2 ROD and Five Year Review recently completed.
 - MMRP should be presented in the next RAB meeting.
- Site 43 – Update
 - A technical memo with alternatives as to how TtNUS proposes to proceed with a Feasibility Study Addendum will be distributed shortly. FDEP and USEPA should evaluate the proposal.
- OU 11 – UFP SAP
 - A technical memo was sent to the team explaining current conditions and recommending a sampling approach.
 - It was discussed that the three random samples taken South of Radford Blvd., to confirm clean fill and samples will be analyzed for Building 71 COCs, the exceedances of the fill sample and for those chemicals that had a higher detection limit than GCTLs. Everyone agreed on such analysis, but FDEP will need to discuss internally before final approval. TtNUS will delay the UFP SAP until FDEP determination is made.
 - After FDEP determination, TtNUS will resume the UFP SAP and start the multi tier review process. Therefore, the current schedule for being in the field on December 2008 is unrealistic.

Action Items:

- ✓ USEPA will send a hardcopy of the signature page for OU2 ROD, compact discs with the whole document and the Five Year Review.
- ✓ TtNUS will forward the email with the information for reservations for the Partnering Meeting on December 2-3, 2008 to Ron Kotun, John Schoolfield and Susan Barnett. **(completed)**
- ✓ TtNUS will verify with Rich May for Tier II information if needed. **(completed, Earl updated us last meeting and no meeting has occurred since then)**
- ✓ TtNUS will send RAB Presentation on the Five Year Review and OU 2 ROD before November 25th, 2008.
- ✓ TtNUS will send a technical memo on how to move forward with Site 43.
- ✓ FDEP will verify internally if the sampling proposed for south of Radford is acceptable according to their standards.

Next Meetings:

- **Partnering Meeting – December 2 & 3, 2008 @ Pensacola**
- **RAB – December 2, 2008**
- **Conference Call – December 12, 2008 @ 10am (EST)**
