RE: Contamination Assessment Report Addendum, Additional
Groundwater Sampling at Site 15, Former Building 2662W,
Naval Air Station Pensacola
Pensacola, Florida
FDEP #179202973

Dear Mr. Hutto:

I have completed the technical review of the Contamination Assessment Report (CAR) Addendum and No Further Action Proposal (NFAP) dated September 19, 1997 (received September 19, 1997), submitted for this site 15. Based upon our telephone conference of November 3, 1997, a Site Assessment Report (SAR) Addendum should be submitted to either recommend monitoring of groundwater with adequate delineation of the lead exceeding 15 $\mu\text{g}/\text{L}$ in the most downgradient wells, or evaluate the groundwater parameters to determine if the aquifer is of low yield/poor quality. If the aquifer meets the low yield/poor quality requirements, then a no further action proposal may be submitted.

If I can be of any further assistance with this matter, please contact me at (904) 921-9989.

Sincerely,

John W. Mitchell
Remedial Project Manager
