OFFICIAL CORRESPONDENCE

Amy Twitty P.G.

CH2MHill, Constructors Inc.

Dear Ms. Twitty,

I reviewed the Soil Sampling and Analysis Plan, Operable Unit 13 dated, May 14, 2002 (received via email May 15, 2002). We discussed this site during our May 7-8, 2002, Tier I Partnering Meeting. The subject document is adequate for its intent but I have a few comments:

1. Good job on putting together a deliverable so quickly.
2. **Figure 3, Sample location 24S10:** You need to correct the label to state that subsurface samples will be collected. Table 2 states that subsurface samples at this location.
3. **Figure 3, Sample location 24S12:** Surface samples should be collected at this location according to the findings shown in Table 1 which state that 11 ppb of Dieldrin was found at 0-1 feet bls.
4. I would like to state that the amount of soil to be excavated may vary according to the findings of this sampling field event.

If you have any questions, please call me at the numbers below.

Sincerely,

Tracie L. Vaught
