RE: Contamination Assessment Report Addendum, AVGAS
Pipeline Site 9, UST 134, NAS Pensacola
FDEP #179202073

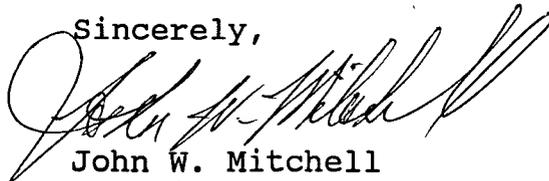

Dear Mr. Glover:

I have completed the technical review of the Contamination Assessment Report (CAR) Addendum and No Further Action Proposal (NFAP) dated October 1995 (received October 6, 1995), submitted for this site (AVGAS Site 9, UST 134). Based upon my review, a No Further Action Proposal (NFAP) cannot be approved until the remaining excessively contaminated soil is removed/remediated.

After removal of the contaminated soil, confirmatory soil samples must be taken. I also recommend a monitoring well be placed in the area of soil sample 09B001 and the ground water analyzed for lead, BTEX, and TRPH. The previous monitoring well 09G001 was upgradient of this soil sample which had the highest TRPH value. Upon receipt of the next CAR Addendum showing clean soil and groundwater, a NFAP can be issued.

If I can be of any further assistance with this matter, please contact me at (904) 488-3935.

Sincerely,

John W. Mitchell
Remedial Project Manager
