Dear Mr. Durham:

In response to your January 30, 1992 letter regarding the installation of temporary monitoring wells at NAS Pensacola, I asked Mr. Jorge Caspary, the Base Coordinator, to review it. He stated that he concurred with your comments in the letter and that work should proceed accordingly. Also, he emphasized the potential need to upgrade the temporary wells to permanent ones if contaminant concentrations exceed State standards.

If I can be of any further assistance with this matter, please contact Jorge or me at (904)488-0190.

Sincerely,

Eric S. Nuzie
Federal Facilities Coordinator

It is the understanding of ABB-ES that FDER recommends the following eleven sites at NADEP be hereafter investigated under RCRA guidelines if a Part B Permit exists at the facilities or under CERCLA guidelines:

Site 604S
Site 647E
Site 647N
Site 648N
Site 649N
Site 649W
Site 709D-N
Site 3220E
Site 3220S
Site 3221SW
Site 3450S

It is understood that this reflects FDER technical opinion and may not be concurrent with opinions of Region IV U.S. Environmental Protection Agency.

Please contact me as soon as conveniently possible if your understanding of the above is different. Based on your concurrence, ABB-ES will recommend the movement of response actions at the above listed sites from the Chapter 17-770 program into the appropriate program (CERCLA or RCRA) for further response actions.

Sincerely yours,
ABB ENVIRONMENTAL SERVICES INC.

Kenneth L. Busen
Technical Director
