RE: Site Assessment Report Addendum, Underground Storage
Tank (UST) Site 19, Naval Air Station Pensacola,
Florida, DEP Facility #179203973

Dear Mr. Glover:

I have completed the technical review of the Site Assessment Report Addendum for UST Site 19, NAS Pensacola dated April 10, 2001 (received April 10, 2001). The document is adequate to meet the contamination assessment requirements of Chapter 62-770, Florida Administrative Code (F.A.C.). Therefore, you must now submit a Remedial Action Plan (RAP) in accordance with Rule 62-770.700, F.A.C.

Since monitoring well MW-17 was dry during the last sampling event, I recommend that remedial activities include the installation and sampling of a deep monitoring well located adjacent to MW-17.

Please submit the RAP in accordance with the approved Management Action Plan for NAS Pensacola. If I can be of any further assistance with this matter, please contact me at (850) 921-9989.

Sincerely,

Joseph F. Fugitt, P.G.
Remedial Project Manager
