Coraopolis, PA 15108

Re: Draft RI/FS Work Plan; Contract N62470-89-D-4814,
CTO-0007

Dear Mr. Barone:

Comments on the Draft RI/FS Work Plan from U. S. Environmental Protection Agency and the DOI Fish & Wildlife Services are provided to you in enclosures (1) and (2).

Prior to commencement of field operations on September 14, 1992, the Navy requests that Baker review enclosures (1) and (2) for comments that will effect the data quality and usability of samples to be collected and analyzed during this field effort. Specific comments that effect data issues such as level of quality control, analytical methods, and analytical constituents should be concentrated on by Baker. Issues pertaining to these comments shall be discussed and agreed upon between LANTDIV's and Baker's project managers and documented with LANTDIV's contract specialist prior to the start of the field effort.

LANTDIV does not want to delay Baker's field efforts with major scope changes resulting from the comments, but does want to be assured that all data collected in this field effort will be comparable to data collected in subsequent field efforts. The remainder of the comments will be required to be addressed after the field work is completed and prior to initiation of any additional field work conducted under a new Contract Task Order.

If you have any questions concerning this matter, please contact Mr. James Szykman at (804) 445-2993.

Sincerely,

L. A. BOUCHER, P.E.
Head
Installation Restoration Section
(South)
Environmental Programs Branch
Environmental Quality Division
By Direction of the Commander
