Corrective Measures Study Work Plan

Dear Mr. Gordon:

On behalf of the Navy, Baker is transmitting under the cover of this letter, two copies of the draft Corrective Measures Study Work Plan for the Tow Way Fuel Farm at Roosevelt Roads. Additional distribution has been made as indicated below my signature.

The Work Plan details the steps to be undertaken to complete the corrective measures study at the site. Provisions for the following items have been made in the plan:

- Establishment of corrective action cleanup goals
- Screening of remedial alternatives
- Identification of the selected remedial alternative
- Cost estimating
- Justification for selection of the remedial measure, and
- Appropriate reporting.

Also, there is a pilot scale demonstration study provided for in the Work Plan. This study proposes using ElectroChemical GeoOxidation as a means of providing multi-media remediation at two locations within the Tow Way. The technology was selected based on its demonstrated ability to produce results, its ability to remediate soil, free product and groundwater in areas of complex hydrogeology and numerous cultural features (e.g., utilities, building foundations).

We appreciate the scheduling latitude you have allowed in the submission of this document. If you have any questions please do not hesitate to call me at 412-269-2065 or Mr. Christopher T. Penny (Navy NTR) at 757-322-4815.

Sincerely,

BAKER ENVIRONMENTAL, INC
