Subject: PREQB Review of Navy RTCs Pineros Island Draft Addendum No. 1 Terrestrial Intrusive Investigation Work Plan to Conduct Phase I RFI

---

Mr. Gordon:

Below is PREQB review of the Navy Responses to PREQB comments on the subject document:

Review of the Navy Responses to Comments on the PREQB Comments on Addendum No 1 - Terrestrial Intrusive Investigation Work Plan to Conduct Phase I RCRA Facility Investigation, Piñeros Island Naval Activity Puerto Rico, Dated January 2010

The Navy's response to technical comments on the subject document indicates that the responses are technically adequate and appropriate. PREQB concurs with the Navy responses and supports the changes to the text recommended in the responses with the addition of the following clarification:

Follow-up to PREQB comment No. 6: EQB requests that the Navy provide an

estimate of the size of each MRS that will be investigated using the "EM and dig" techniques. Are the areas that will be investigated the exact same areas that were previously investigated using DGM as shown in the Arm Group technical report (Appendix A to the work plan addendum)? Please clarify this issue.

Please let me know if you have any questions. Thanks.
