Subject: Re: SWMU 67 Draft Final RFI Responses to Comments and Redline Draft Final Change Pages

Good Morning:

PREQB finished the review of the responses to comments. Below please find our only outstanding comment.

Have a nice day, Gloria

Technical Review of the Navy's Responses to PREQB Comments on the Draft Final Phase I RCRA Facility Investigation report for SWMU 67 – Former Gas Station, Naval Activity Puerto Rico, Ceiba, Puerto Rico

The Navy's responses to PREQB comments are accepted, with the exception of Comment 9, as discussed below. Note that for Page-Specific Comment 1, please consider removing "The following information has been added to Section 2.2.2" from the text inserted into the revised document.

1. PREQB Comment 10 (noted as Comment 9 in the Navy's Response to Comment letter), Appendix A, Field Investigation Information: It appears that the boring logs for the January and July 2014 soil samples were not provided. Please verify and provide.

Navy Response: Due to the close proximity of the additional soil samples to SB01 (characterized during the 2011 field event), additional soil boring logs were not generated during the 2014 field event. Field observations made during the 2014 subsurface soil sampling did not indicate notable differences between the conditions observed at the six sample locations (67SB09-14) and 67SB01.

PREQB Evaluation of Response: PREQB prefers that boring logs be generated for all soil borings, even if the boring is in the vicinity of another boring with similar conditions. Please provide the boring logs for the January and July 2014 soil borings.

Subject: SWMU 67 Draft Final RFI Responses to Comments and Redline Draft Final Change Pages

Hi Gloria and Doug,

Attached are responses to PREQB and EPA comments on the Draft Final SWMU 67 RFI along with redline change pages reflecting revisions to the RFI as a result of comments. Please let us know if you are in agreement with the responses to comments and CH2MHill will issue the Final RFI for regulatory approval.

Thanks!

Jamie Butler
