RE: Final Technical Memorandum (June 10, 2013), Work Plan for Additional Monitoring Well Installation and Groundwater Sampling Activities, UST Site 2406, Saufley Field, Pensacola, Florida.

Dear John:

I have completed my review of the Final Technical Memorandum (June 10, 2013), Work Plan for Additional Monitoring Well Installation and Groundwater Sampling Activities, UST Site 2406, Saufley Field, dated June 11, 2013 (received June 12, 2013), prepared and submitted by Tetra Tech, Inc. Revisions in the number of shallow, intermediate and deep wells, the use of lithologic data to select the well screen intervals and the decontamination methodology have all been made satisfactorily. The Tech Memo is therefore approved and the work may commence as described.

If you have any concerns regarding this letter, please contact me at (850) 245-8997.

Sincerely,

David P. Grabka, P.G.
Remedial Project Manager
Federal Programs Section
Bureau of Waste Cleanup
