Subject: Review/Revision of Risk Assessment Results for Whiting Field

Dear Ms. Martin:

Attached is the requested additional evaluation of the human health risk assessment results for the Naval Air Station (NAS) at Whiting Field (Sites 3, 4, 6, 30, 32, and 33). The evaluation focused on the number of years associated with the one-in-one-million risk level for each receptor evaluated and was based on current contaminant levels at the sites under investigation. The narrative provides a summary of the risk evaluation. Details are provided in attached tables and spreadsheets. As requested, the information is presented as an informal deliverable at this time.

Please call me at 412-921-8887 if you have any questions regarding the enclosed document.

Sincerely,

Phil Ottinger
