Subject: FW: Questions on Whiting Field

Larry,

Please read email below and contact Charlie Evans from URS. Did I send you this already?

Sarah,

They can contact URS and Mr Evans could either respond or provide a POC at URS who can respond. But please be advised URS is not under contract to perform the Geotech yet. Contracting officer (Mrs Eleanor Drake) has sent them the scope of work. URS is in the process of providing a price quote so we can negotiate. I need to respond to their question below in order for them to provide a price.

Thanks,

B. Kevin Grove

Hi Kevin,

I was actually looking for a contact for URS. Would it be ok if TtNUS could contact URS to ask them some questions concerning scheduling and the field events? Would Mr. Evans be the proper POC?

Let me know.

Thanks,
Sarah

Kevin, Please assist Mr Walker so he can work on your fee proposal.

Thanks,
Eleanor

Questions on Whiting Field

Fred,

We are trying to finalize a proposal for the geotechnical work at the Whiting Field, South Field Control Tower Recapitalization. We have several items we need resolved to finish the proposal. They are:

1. The statement of work refers to "see attached figures", but I am not aware that we received any.
2. It would be very helpful to have an aerial photograph or site plan of the area with the tower footprint indicated.
3. Assuming the tower footprint is less than 10,000 sf, we would propose to perform 3 SPT borings to 75-foot depth each. Is that acceptable? Also, are there any other features (new construction) to be addressed in the geotechnical report?
4. If the site is paved, is it known what type of pavement is present and about how thick it is?
5. Since this is a reported IR site, we will ask that the drill crew have completed 40-hour OSHA training. No other special procedures are planned. Please confirm we do not need to collect, drum, and dispose of cuttings and samples. Also, confirm we do not need to perform decontamination of the drilling equipment and samplers.
