Gentlemen:

As requested by your letter of August 28, 1986, please be advised that well number WS-2 (South Well) was taken out of service on August 28, 1986. Southern Division, Naval Facilities Engineering Command, Charleston, South Carolina will be contacting you directly regarding the additional sampling and analysis.

As requested in a telephone conversation from Mr. Bob Corte of your department to Mr. Danny Locklear of Naval Air Station, Whiting Field on September 3, 1986, I am forwarding information on the wells that were operating on certain dates. The dates correspond to the sampling dates listed in enclosure (1) of Southern Division, Naval Facilities Engineering Command letters of July 1, 1986 and August 14, 1986. I would like to point out that the three wells are normally rotated at midnight each night; each well operating every third day. In an effort to assist you in establishing a correlation between the wells and the analysis, I have identified the wells that operated on the day preceding sampling by dates in parenthesis.

Sincerely,

R. A. KECHTER
Commander, CEC, U.S. Navy
Public Works Officer
By direction of the
Commanding Officer
