RE: Remediation Work Plan, Quality Control Program Plan Addendum, and Addendum to the Site Safety and Health Plan: Sites 9, 10, 17, 18, 31C, Interim Remedial Action; NAS Whiting Field

Dear Ms. Martin:

I have reviewed the above document dated December 1998 (received February 1, 1999). It is my understanding that several or all of the proposed actions have been substantially or fully completed. Accordingly, I cannot issue my approval or disapproval of the document. Please prepare a completion report for each of the above sites and insure that sufficient data and information are enclosed to allow for a complete review of the actions taken at each site, including contaminant delineation, waste disposal, analytical quality control, contaminant removal confirmation, engineering or geological interpretations and other pertinent information. Additionally, please insure that the document is properly certified according to applicable Florida law.

The actions by the Navy at these sites have been undertaken prior to completion of the normal sequence of studies and evaluations; in some cases, prior to completion of the remedial investigation. While this may be irregular, I have no legal basis to default those actions; however, I am obligated to ensure that the actions that were taken meet applicable Florida rules and standards. Please insure that the subsequent documents meets those standards. If you have questions or require further clarification, please contact me at (904) 921-4230.

Sincerely,

James H. Cason, P.G.  
Remedial Project Manager
