Subj: REQUEST FOR SITE-SPECIFIC ARSENIC SOIL CLEANUP LEVELS: COVERED
LANDFILL SITES, NAS WHITING FIELD, FLORIDA

Dear Mr. Cason:

After again reviewing ABB Environmental Services, Inc.'s, on behalf of Southern Division Naval Engineering Command, submittal of Appendix I of the General Information Report for Naval Air Station Whiting Field Milton, Florida dated 22 APR 1998 requesting a Site-Specific Arsenic Soil Cleanup Level; Covered Landfill Sites, on NAS Whiting Field, it became apparent Site 12 was inadvertently left out of the submittal.

In a Geraghty & Miller, Inc. final report dated June 1984, titled Hydrogeologic Assessment and Ground-Water, Monitoring Plan, presently Site 12 Tetraethyl Lead Disposal Area was referred to as Landfill # 1. This report also stated the area was dug to allow the disposal of the sludge then in 1965 the landfill was covered and closed. Since Site 12 is a "covered landfill site", the Navy request it be added to the list for a Site-Specific Arsenic Soil Cleanup Levels: Covered Landfill Sites, NAS Whiting Field for approval with the same conditions as spelled out in FDEP's letter of 27 APR 1998.

If you have any questions or require further clarification concerning these comments, please contact me at (843) 820-5574.

Sincerely,

Linda A. Martin
