**SUBJECT: Errata pages for Site 19B Closure Report and the  
Remedial Action Decision Document for Site 19B & 20B  
CTO 31, OLF Barin, Foley, Alabama  
Contract #N62467-89-D-0317, 031**

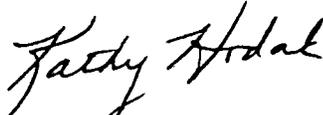

Dear David:

Attached please find a copy of the response to comments for both of the aforementioned documents. This is followed by an instruction sheet for substitution of selected "errata" pages in your previously received documents. You will note, that incorporation of the closure reports as appendices to the Decision Document necessitated a new (bigger) binder.

If you have any questions concerning this information please don't hesitate to give Eric Blomberg (Ext. 316) or me (Ext. 256) a call.

Sincerely,

ABB Environmental Services, Inc.

## PROJECT REVIEW COMMENTS

**OLF Barin, Foley, Alabama  
Remedial Action Decision Document  
Site 19B, Former Hangar Maintenance Area, &  
Site 20B, Abandoned Underground Storage Tanks and Fuel Pit Area**

#### **SPECIFIC COMMENTS**

- 1. Instead of referencing the Closure Reports for Sites 19B & 20B, it is preferred that any data, text, or figures that would support the Remedial Action Decision be included in this document.**

The Remedial Action Closure Reports for Sites 19B and 20B will be included as appendices in the Remedial Action Decision Document for Sites 19B and 20B.

- 2. Section 2.3: The history of the two sites needs to be updated to reflect the wash rack's USTs being removed at Site 19B and the work performed on the fast fuel lines and fuel pits.**

Section 2.3 will be updated as requested.

- 3. Section 3.6: This section should include PAHs sampling performed in December 1996 since the lube oil tanks was the reason for taking the samples.**

The PAH sampling and results will be included in Section 3.6.

- 4. The facility production well location was not added to Figure C-1 as stated in the response to comments for comment #6 in the July 26, 1996, letter.**

The production well is on Figure C-1 and is identified as well WHF-19B-MW-11D.

- 5. Information that was requested in Comment #10 from the July 26, 1996, letter was not included in this document. The comment requested that the high Hazardous Quotient of 73 be mentioned in the groundwater conclusion on page A-8.**

The high Hazard Quotient of 73 will be mentioned in the groundwater conclusion on Page A-8.
