RE: Draft Remedial Action Decision Document
Site 22B, Old Firefighting Demonstration Area
OLF Barin, Foley, Alabama

Dear Mr. Adams:

The Alabama Department of Environmental Management has reviewed the referenced document, and offer the following comments.

1. Page 3-5, Table 3-2: Sample WHF-22B-SS-13 needs to be included in the figure.
2. Page 3-14, Table 3-5: The units should be ($\mu\text{g}/\text{kg}$) instead of (mg/kg). Add the data when the samples were taken. Include 2 times average background concentrations from the 1993 sampling event to the table for comparison.
3. Recheck the Semivolatile Organic Compounds to see if they pass the CPC criteria. If they do, include them in the Risk Assessment.
4. Page 3-20, Table 3-8: The MCL for lead is 15 ($\mu\text{g}/\text{l}$) not 315 ($\mu\text{g}/\text{l}$).
5. Page 4-2, 1st paragraph: If burning occurred, wouldn't PAHs be expected?

If you have any questions, please contact me at 334-213-4322.

Sincerely,

A handwritten signature in black ink that reads "David Thompson".

David Thompson
