RE: Final 2010 Land Use Control Inspections Report, Naval Air Station Whiting Field, USEPA ID #FL2 170 023 244, Milton, Florida (AEROSTAR, March 1, 2011)

Dear Mr. Fisher:

I have reviewed the subject document dated March 1, 2011 (received March 1, 2011). Land Use Control (LUC) inspections for the referenced sites (Sites 1, 10, 11, 13, 15, 16, 17, 18, 30, 32, 33, and 35) were conducted on November 10, 2010 by AEROSTAR personnel. It has been duly noted that NAS Whiting Field stated Site 14 had received a No Further Action (NFA) without controls letter from the Department and requested that it be removed from the inspection list and Site 1 was to be added. This report states that all sites appear to be in compliance with their LUC requirements per their respective LUC Remedial Design (RD) document. Due to the findings in this report, and the completed Compliance Certificates for these sites, I concur with AEROSTAR that these sites appear to be in full compliance.

Thank you for the opportunity to review this document. If you require additional clarification or other assistance, please feel free to contact me at 850/245-8999.

Sincerely,

John Winters, P.G.
Remedial Project Manager
