Subj: UNFILTERED METALS ANALYSIS FOR GROUNDWATER AT NAVAL
AIR STATION, ALAMEDA

Dear Mr. Lanphar:

In your letter of January 30, 1995, enclosing the Regional Water Quality Control Board (RWQCB) letter of January 10, 1995, you requested that the Navy collect a representative number of unfiltered samples for metals in all future groundwater investigations at Naval Air Station (NAS) Alameda.

As discussed during our meeting on March 14, 1995, filtered analysis will continue for all wells as proposed in the field sampling plans as this is necessary for comparison with past data. The Navy is working to implement this additional work. A maximum of 10% of the wells being sampled under the Installation Restoration Program, will be sampled unfiltered and analysis will be for metals only. This equates to approximately 25 wells being sampled in this manner. Filtered and unfiltered samples will be taken at the same time for comparability. It is expected that two rounds of unfiltered sampling can be performed if the wells to be sampled can be agreed upon within a short time.

If you have any additional questions regarding this matter, please feel free to contact Mr. George Kikugawa at (415) 244-2555, Fax (415) 244-2341.

Sincerely,
