Modesto, California 95356

Subj: Exemption for Detail Screening of Existing Soil Vapor Extraction (SVE)
Permit at National Aeronautics and Space Administration (NASA) Crows
Landing Flight Facility

Dear Mr. Singh:

The U.S. Navy requests an exemption for detail screening of its existing SVE air discharge permit to operate (#N-3871-1-1) for Underground Storage Tank 117 at NASA Crows Landing Flight Facility (formerly Naval Auxiliary Landing Field Crows Landing). Based upon the previous risk analysis performed by the Air District, and extrapolating the risk over the requested two year extension of the project, the priority score projection will still be under one in a million. The Navy, therefore, requests an exemption for detail screening of its air permit #N-3871-1-1.

Please call me at (650) 244-2562 or Steve Annecone of Tetra Tech EM Inc. (TtEMI) at (303) 312-8886 should you have any questions. Thank you for your consideration.

Sincerely,
