Subject: Exploratory trenching at former oxidation ponds, NASA Crows Landing Flight
Facility

Hello All,

The purpose of this message is to notify you that we are revising our estimated starting date for the exploratory trenching at the former oxidation ponds (IRP Site 11A). We are working with NASA to schedule an electrical utility outage in the oxidation pond vicinity. The electrical outage will create safer working conditions during the intrusive activities.

We believe that the electrical utility outage will be completed on or around 8 August 2002, and we are planning to begin our trenching activities the week of 12 August 2002.

If you would like to visit the site to observe the trenching activities, please coordinate your visit with Bob Hulet or Eddie Ramirez at the contractor's field office ((209) 837-0419 or (209) 837-0416).

Please do not hesitate to call me if you have questions pertaining to the project.

Thank you very much.

V/R
