Subject: Update on Planned Aquifer Test at NASA Crows Landing Flight Facility

Hello All,

This message is intended to provide a brief update on the planned aquifer test at Crows Landing.

We constructed a new groundwater extraction well (117-EX-03) between former UST Site 117 and Bell Road near the eastern edge of the Administration Area Plume in early 2003. We plan to conduct aquifer testing activities during the period from 17 to 19 March 2003. We also constructed piezometers along Bell Road and near the new extraction well, and we will be monitoring water levels at nearby piezometers and nearby monitoring wells during the aquifer testing activities.

You are invited to visit the site to observe aquifer testing activities. Please coordinate site visits with the Navy's contractor, Shaw, at the Crows Landing field office. Please contact the project manager, Bob Hulet, or the project superintendent, Eddie Ramirez, at the field office at (209) 837-0416 in advance of your site visit. A 24-hour advance notification will be greatly appreciated.

We will be publishing data summaries and/or information transmittals as data from the piezometers and new extraction well becomes available.

Please do not hesitate to contact me if you have questions pertaining to this project.

Thank you.
