CROWS LANDING
SSIC NO. 5090.3.A

Public Notice
**U. S. Navy Completes the Excavation and Removal
of Waste, Debris, and Contaminated Soils at
NASA Crows Landing Flight Facility**

The Navy completed the excavation and removal of buried waste, debris, and contaminated soils at the former oxidation pond area of Site 11A at NASA Crows Landing Flight Facility in March 2003. The project was conducted as a time-critical removal action in accordance with the requirements of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The oxidation ponds were part of the original sewage treatment facility that was abandoned in the early 1950's. The oxidation ponds were filled with waste, debris, and ash following the abandonment of the treatment facility. Approximately 19,000 tons of waste, debris, and contaminated soils were removed and transported to off-site treatment and/or disposal facilities. Excavations at the former oxidation pond area will be filled with clean soil and a Summary Report will be prepared.

The Action Memorandum, Project Plans, and other documents pertaining to the project are available at the Stanislaus County Library, Patterson Branch on 46 North Salado, Patterson, California.
