Re: Construction Contract No. N62474-93-C-2271, Removal of Fuel Storage Tanks, Naval Auxiliary Landing Field, Crows Landing, CA

This department has reviewed the above referenced document submitted as an underground storage tank closure plan. There are two items of concern in the plan that need to be addressed:

1. Piping in special areas (ref: Section 02060, Page 8, G) any piping to be abandoned in place must be pressure tested for tightness. This department will grant authorization to seal the lines after the test results are reviewed.
2. Soil Removal, Sampling and Disposal (ref: Section 02060, Page 11, 3.4) Soil Sampling shall be conducted in accordance with the "Stanislaus County Guidelines For Sampling and Site Investigation", Second Edition, September 1989, and the California Code of Regulations, Title 23, Division 3, Chapter 16, Article 7. Any deviation from the above for soil sampling conducted during tank removal must be approved prior to commencement of work.

Please review the above concerns and call me if you have any questions.
