DRAFT ADDITIONAL INVESTIGATION AND GROUNDWATER MONITORING
WORKPLAN, INSTALLATION RESTORATION PROGRAM (IRP) SITE 17,
ADMINISTRATION AREA PLUME, NASA CROWS LANDING FLIGHT FACILITY,
CROWS LANDING, CALIFORNIA

Dear Mr. Sullivan:

Thank you for the opportunity to review the above referenced document which was prepared to outline the Navy's plans to conduct additional groundwater investigation activities and monitoring at IRP Site 17. The objective of the investigation is to evaluate the on-site and off-site extent, and contaminant concentration, of the Administration Area Plume. The investigation will include, but is not strictly limited to, the following components:

- Perform on-site plume characterization including the installation of new groundwater monitoring wells.
- Perform off-site plume characterization including the installation of new groundwater monitoring wells.
- Perform groundwater sampling events quarterly and semi-annually.

Based on our review of the workplan, we conclude the document is well written and have no comments to provide with the exception of an editorial comment regarding the numbering of the Figures in Section 2. The figures in this section need to be labeled and numbered consistent with their references in the text.

Mr. James Sullivan
