SUMMARY REPORT FOR AERIAL PHOTOGRAPH ANOMALY (APHO) 10, MARINE CORPS AIR STATION (MCAS) EI TORO

Dear Mr. Gould:

The Department of Toxic Substances Control (DTSC) has reviewed the above report dated August 31, 1999 and received by this office on September 15, 1999. The report presents the results of the record search activities and a visual inspection of APHO 10 (Also known as Science Applications International Corporation (SAIC) 79). The anomaly is described as an open storage area west of the former Building 286 which has been demolished.

The report states that the aerial photograph for APHO 10 was dated 1955. Section 2, page 2, top paragraph, states that APHO 10 was identified on a photograph dated 14 March 1973. Please correct this discrepancy.

The report recommends a no further action status for APHO 10 based on evaluation of historical aerial photographs, Station maps and plans, Station property records, environmental program management plans, the results of previous environmental restoration program investigations, and a visual site inspection conducted in August 1999. No stains or discolored areas were observed during the visual inspection.

Based on our review of the documentation presented, DTSC concurs with the proposed no further action status designation for APHO 10. The no further action status can be documented in the next BRAC Cleanup Plan update.

Mr. Dean Gould
